

Evansville Mobile Car Detailing

Appointments through phone calls, texts, social media, and word of mouth [01]

Details must be collected manually [02]

Job length and travel time must be calculated manually [03]

Appointments are manually entered into Google Calendar [04]

Increasing clientele means more communication, time spent on calls and searching messages, scheduling mistakes, and management stress [05]

SOLUTION

Mobile Detailing Scheduler!

Lily & Jakub

A simple web-based appointment scheduler, with an emphasis on simplicity and automation, built specifically for the business.

Customers access it through a link — no app download required.

1.

Enter necessary contact and vehicle information

2.

Choose detailing package and add-on services

3.

Automatically estimate time required for the job, and show only times that can accommodate the selected services and travel

4.

Owner controls services, options, and available time slots

Why This Project?

Real Outcome for a Real Business

A more uniform, reliable, and automated approach would result in less management stress, less scheduling mistakes, and a more professional client experience.

Feasible & Scalable

The scheduling features will require skillful design and development, yet are not overly ambitious.

Additional features such as payment, appointment reminders, and no-show fees could be explored if time permits.

Solves a unique, targeted problem

Many scheduling applications exist, but few address the specific needs of mobile car detailing without adding unnecessary complexity for the customer or business owner, creating a need for a specialized yet simple scheduling system.

Owner is highly available

Owner is Lily's brother! We can communicate anytime.
